

D4.1 A – Obtain ethical approval for cross-site validation studies and ring testing

EQIPD – GA 777364
 IMI2-2016-09-03

European Quality In
 Preclinical Data

WP4 – Prospective cross-site validation of guiding principles in specific assay

Lead contributor	Martien Kas (7 – RUG) m.j.h.kas@rug.nl
Other contributors	Sylvie Ramboz (25 – PGI) Emer Leahy (25 - PGI)

Due date	31/05/2018
Delivery date	30/07/2018
Deliverable type	R
Dissemination level	Public

Description of Work	Version	Date
	V1.0	07/08/2017

Document History

Version	Date	Description
V1.0	16/07/2018	First Draft
V2.0	30/07/2018	Final Version

Summary

The EQIPD partners participating in WP4 have now all obtained (and filed) copies of ethical approval for cross-site validation studies as well as the ring testing. Nearly all partners already received the ethics approvals in time and before 31/5/2018. Only the ethics approval of partner BI was slightly delayed but is now in place (since July 2018).

Table 1: Overview of copies of ethical approvals for the animal studies in WP4 of involved EQIPD partners.

Partner No.	Acronym	D4.1: - Obtain ethical approval for cross-site validation studies and ring testing	Comment
6	UNIABDN	On file and available on request	N/A
7	RUG	On file and available on request	N/A
8	UBERN	On file and available on request	N/A
12	LMU	On file and available on request	N/A
14	Sylics	On file and available on request	N/A
19	Janssen	On file and available on request	N/A
20	Abbvie	On file and available on request	N/A
21	BI	On file and available on request	N/A
25	PGI	On file and available on request	N/A

Conclusion

All EQIPD partners confirmed to have copies of ethical approval for cross-site validation studies and ring testing in place which can provide to IMI upon request.
